CORE EXPERTISE

Third-Party Risk Management | **Vendor Security Assessments** | **Risk Registers & Treatment Plans** | **AI Agents for GRC** | Power Automate | Power BI | Evidence & Control Mapping | Residual Risk | ServiceNow CMDB / CSDM | Software Asset Management | Microsoft Licence Governance | ISO / SOC / NIST / PCI Concepts

PROFESSIONAL EXPERIENCE

Risk Management Analyst | *Ashley Furniture Industries* **Jul 2025 – Present**

THIRD-PARTY RISK, AI AUTOMATION AND GOVERNANCE

- Conduct vendor risk reviews by analysing security questionnaires, privacy and security evidence, policies, certifications, audit reports, Trust Centre content and supporting documentation.
- Assess control applicability, evidence quality, gaps, compensating controls, business impact and residual risk across information security, access management, data protection, vulnerability management, business continuity and governance.
- Prepare risk observations, acceptance rationales, mitigation actions, evidence references, ownership and follow-up requirements for risk-register and management review.
- Supported 14 vendor reviews and documented 27 risk-register entries in the Q3 2026 evidence portfolio, including accepted risks and mitigation responses.
- Maintain vendor questionnaires, evidence and completed review records in SharePoint to strengthen traceability and future reassessment readiness.

AI & AUTOMATION HIGHLIGHTS

- Built and tested a Risk Analyst Agent in Microsoft 365 Copilot to support first-pass review of vendor questionnaires and security evidence, with human approval retained for final risk decisions.
- Refined the agent by comparing outputs with completed human reviews and adding checks for missing responses, evidence quality, document versions, dates, recurring risks and risk-appetite rules.
- Created and tested a Policy Review Reminder and a Phishing Quarterly Manager Notification solution using Power Automate.
- Explored phased integration of the Risk Analyst Agent with TruOps to structure findings and reduce repeated manual hand-offs while preserving reviewer accountability.

ASHLEY FURNITURE – ADDITIONAL CONTRIBUTIONS

- Created risk-review and phishing-reporting views in Power BI for executive metrics, quarterly trends, training status, manager and department analysis, and repeat-compromise follow-up.
- Prepared management-ready evidence portfolios covering vendor reviews, risk-register activity, AI agents, Power Automate flows, dashboards and learning progress.
- Supported Microsoft licence allocation, utilisation analysis, Enterprise Agreement renewal preparation, licence-profile comparisons and Security BVA questionnaire inputs.
- Collaborated with Power BI and HR stakeholders to consolidate workforce and licence data, resolve inconsistencies and improve reporting accuracy using PowerShell-assisted extracts.
- Provided business inputs for ServiceNow HAM Pro workflow development and identified governance gaps such as unused licences not being reclaimed.
- Applied learning from ISO 27001, NIST CSF/RMF, PCI DSS, SOC assurance, CSA CCM/CAIQ and AI governance to vendor evidence reviews and risk documentation.

EARLIER EXPERIENCE

Senior Analyst – IT Asset Management | *Prodapt (Vendor)* **Jan 2023 – Jun 2025**

- Managed enterprise asset inventory and lifecycle records in ServiceNow CMDB, including allocation, transfers, break-fix, lost or stolen assets, disposal and reporting.
- Supported incident and configuration management, escalations, VPN-token provisioning and asset-data validation with end-user support teams.
- Coordinated hardware, software and leased-equipment procurement; validated vendor quotations, supported purchase-order creation and initiated buyback activities.
- Prepared asset and software-licence reports, supported compliance assessments and collaborated with vendors and business stakeholders.

Software Engineer | *TCS (Vendor)* **Nov 2022 – Dec 2022**

- Supported IT operations and asset-management activities in a short-term vendor engagement.

Vendor – Asset Management | *Wipro* **Feb 2021 – Oct 2022**

- Maintained hardware and software inventory and supported asset tracking from acquisition through disposal.
- Assisted with software-licence compliance, inventory reconciliation, procurement coordination, vendor management and operational reporting.

CERTIFICATIONS & LEARNING

- ServiceNow Certified Implementation Specialist – Data Foundations (CMDB & CSDM).
- AI Literacy Path – AI Practitioner: Cyber Security, including Agentic AI risk, AI-agent governance, responsible AI, human oversight and LLM security.
- Completed 4 Microsoft certification courses and 6 Udemy certificates, with 131+ total learning hours.
- Currently pursuing ServiceNow CIS – Software Asset Management (SAM Pro), ISO 27001 ISMS certification and further GRC development.

SELECTED PROJECTS & RECOGNITION

Risk Analyst Agent
Evidence-grounded Copilot agent for structured vendor questionnaire and security-evidence review.

GRC Automation Portfolio
Risk Analyst Agent, Policy Review Reminder and Phishing Quarterly Manager Notification.

Risk & Phishing Analytics
Power BI reporting for risk visibility, trends, training status and targeted follow-up.

Achievement
Best Team Player Award; internal hackathon contribution to a Voice Shopping Assistant using .NET and Visual Studio Code.
